

## Digital Crimp Height Micrometer Model CBMS 25

- Micrometer for exact measurement of crimp height
- Anvil/blade and spindle with pointed cone
- Range 0-25 mm
- Resolution 0,001 mm
- Indication switchable mm to inch
- Ratched Stop for constant force
- Thimble and sleeve satin chrome polish, frame enamelled
- Buttons: zero, power on/off, inch/mm
- Serial interface RS232
- Protection IP54
- Power supply: battery SR44
- incl. storage box.

## Digital Micrometer Model BMS-2P

- Pointed spindle and anvil tips to measure the crimp width, crimp width, web thickness of drills, small grooves, keyways.
- Range 0-25 mm
- Resolution 0.001 mm
- Indication switchable mm to inch
- Ratched Stop for constant force
- Thimble and sleeve satin chrome polish, frame enamelled
- Buttons: zero, power on/off, inch/mm
- Serial interface RS232
- Protection IP54
- Power supply: battery SR44

## Digital Micrometer Model BMS-2S

- Micrometer with blade tips e.g. to measure the crimp width, crimp width, groove diameter of shafts and keyways.
- Range 0-25 mm
- Resolution 0.001 mm
- Blade tips 0.75x6x6.5 mm
- Indication switchable mm to inch
- Ratched Stop for constant force
- Thimble and sleeve satin chrome polish, frame enamelled
- Buttons: zero, power on/off, inch/mm
- Serial interface RS232
- Protection IP54
- Power supply: battery SR44

## Stand for micrometer

- Rugged stand for micrometer
- Material: cast iron
- Surface enamelled
- Weight ca. 1,1 kg

## Micrometer Inspection Gauge Block Set

- Rectangular gauge block set for inspection of micrometers
- Made of ceramic
- Test set for micrometers 0-25 mm
- Blocks per set: 10
- Block sizes:  
2,5 / 5,1 / 7,7 / 10,3 / 12,9 / 15 / 17,6 / 20,2 / 22,8 / 25 mm,  
1 pc. optical parallel.
- Grade: 0
- inclusive inspection certificate
- optional: calibration certificate.
- Ceramic gauge blocks are extremely wear and corrosion resistant and provide an excellent dimensional stability
- Meets ISO3650

## Metric Rectangular Gauge Blocks and Gage Block Sets

Additional gauge block sets and single rectangular metric gauge blocks are available on request.

## Gauge Block Holder

- Gauge block holder for inspection of micrometers
- A series of gauge blocks can be fixed
- Clamping range 0-200 mm
- Can be used in both horizontally and vertically arrangement
